Declaration of Conformity

Trade Name:	SONY
Model No.:	PCV-1142
Responsible Party:	Sony Electronics Inc.
Address:	680 Kinderkamack Rd. Oradell, NJ 07649, USA
Telephone:	201-930-6972

This phone number is for FCC-related matters only.

This device complies with Part 15 of the FCC rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

Model No.: PCVA-IMB5A (For models equipped with Giga Pocket features)

This device complies with Part 15 of the FCC rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- ☐ Reorient or relocate the receiving antenna.
- ☐ Increase the separation between the equipment and the receiver.
- ☐ Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- ☐ Consult the dealer or an experienced radio/TV technician for help.

You are cautioned that any changes or modifications not expressly approved in this manual could void your authority to operate this equipment.

Only peripherals (computer input/output devices, terminals, printers, etc.) that comply with FCC Class B limits may be attached to this computer product. Operation with noncompliant peripherals is likely to result in interference to radio and television reception.

All cables used to connect peripherals must be shielded and grounded. Operation with cables, connected to peripherals, that are not shielded and grounded, may result in interference to radio and television reception.

FCC Part 68

This equipment complies with Part 68 of the FCC rules and the requirements adopted by the ACTA. On the modem card is a label that contains, among other information, a product identifier in the format US:AAAEQ##TXXXX. If requested, this number must be provided to the telephone company.

This modem uses the USOC RJ-11 telephone jack.

A telephone plug and jack used to connect this equipment to the premises wiring and telephone network must comply with the applicable FCC Part 68 rules and requirements adopted by the ACTA. The REN is used to determine the quantity of devices which may be connected to the telephone line.

Excessive RENs on the telephone line may result in the devices not ringing in response to an incoming call. In most, but not all areas, the sum of the RENs should not exceed five (5.0). To be certain of the number of devices that may be connected to the line, as determined by the total RENs, contact the telephone company. For products approved after July 23, 2001, the REN for this product is part of the product identifier that has the format US:AAAEQ##TXXXX. The digits represented by ## are the REN without a decimal point (e.g. 03 is a REN of 0.3). For earlier products, the REN is separately shown on the label.

If this equipment causes harm to the telephone network, the telephone company will notify you in advance that temporary discontinuance of service may be required. But if advance notice is not practical, the telephone company will notify the customer as soon as possible. Also, you will be advised of your right to file a complaint with the FCC if you believe it is necessary.

The telephone company may make changes in its facilities, equipment, operations or procedures that could affect the operations of the equipment. If this happens, the telephone company will provide advance notice in order for you to make the necessary modifications in order to maintain uninterrupted service.

If trouble is experienced with this equipment, for repair or warranty information, please contact the Sony Customer Information Service Center at 1-888-4-SONY-PC (1-888-476-6972), or write to the Sony Customer Information Center, 12451 Gateway Blvd., Fort Myers, FL 33913, USA, or find Sony Customer Service on the Web at <http://www.sony.com/pcsupport>. If this equipment is causing harm to the telephone network, the telephone company may request that you disconnect the equipment from the network until the problem is resolved.

Repair of this equipment should be made only by a Sony Service Center or Sony authorized agent. For the Sony Service Center nearest you, call 1-888-4-SONY-PC (1-888-476-6972), or visit the Sony Online Support Web site at <http://www.sony.com/pcsupport>.

Connection to Party Line Service is subject to state tariffs. Contact the state public utility commission, public service commission, or corporation commission for information.

If your home has specially wired alarm equipment connected to the telephone line, ensure the installation of this equipment does not disable your alarm equipment. If you have questions about what will disable alarm equipment, consult your telephone company or a qualified installer.

Please use a surge arrestor against electrical surges.

Telephone Consumer Protection Act of 1991 (United States)

The Telephone Consumer Protection Act of 1991 makes it unlawful for any person to use a computer or other electronic device, including FAX machines, to send any message unless such message clearly contains, in a margin at the top or bottom of each transmitted page or on the first page of the transmission, the date and time it is sent and an identification of the business, other entity, or individual sending the message, and the telephone number of the sending machine or such business, other entity, or individual. (The telephone number provided may not be a 900 number or any other number for which charges exceed local or long distance transmission charges.)

In order to program this information into your facsimile machine, see your fax software documentation.

Disposal of Lithium Battery

You can return your unwanted lithium batteries to your nearest Sony Service Center or Factory Service Center.

In some areas the disposal of lithium batteries in household or business trash may be prohibited.

For the Sony Service Center nearest you, call 1-888-476-6972 in the United States or 1-800-961-7669 in Canada.

Do not handle damaged or leaking lithium batteries. In some areas, the disposal of lithium batteries in household or business trash may be prohibited.

Danger of explosion if battery is incorrectly replaced. Replace only with the same or equivalent type recommended by the manufacturer. Discard used batteries according to the manufacturer's instructions.

The battery pack used in this device may present a fire or chemical burn hazard if mistreated. Do not disassemble, heat above 212°F (100°C), or incinerate. Dispose of used battery promptly. Keep away from children.

Ne pas manipuler les batteries au lithium qui fuient ou sont endommagées.

Une batterie non conforme présente un danger d'explosion. La remplacer seulement par une batterie identique ou de type équivalent recommandé par le fabricant. Évacuer les batteries usées selon les directives du fabricant.

La manutention incorrecte du module de batterie de cet appareil présente un risque d'incendie ou de brûlures chimiques. Ne pas démonter, incinérer ou exposer à une température de plus de 100°C. Évacuer promptement la batterie usée. Garder hors de portée des enfants.

Industry Canada Notice

This equipment meets the applicable Industry Canada technical specifications.

The Ringer Equivalence Number (REN) is an indication of the maximum number of devices allowed to be connected to a telephone interface. The termination on an interface may consist of any combination of devices subject only to the requirement that the sum of the RENs of all the devices does not exceed 5.

Avis de L'Industrie Canada

Le présent matériel est conforme aux spécifications techniques applicables d'Industrie Canada.

L'indice d'équivalence de la sonnerie (IES) sert à indiquer le nombre maximal de terminaux qui peuvent être raccordés à une interface téléphonique. La terminaison d'une interface peut consister en une combinaison quelconque de dispositifs, à la seule condition que la somme d'indices d'équivalence de la sonnerie de tous les dispositifs n'excède pas 5.

Setting up the remote control

Insert two AA batteries (supplied) into the remote control as shown.

Inserting batteries into the remote control

 If your remote control does not operate properly, you may need to replace the batteries. When your remote control is not being used for extended periods of time, remove the batteries to avoid possible damage from battery leakage.

Setting Up Your Computer

Your computer may not be equipped with all of the hardware features described in the section. The location of the controls, ports, and jacks may vary from the illustrations shown. See the online Specifications sheet for your computer's specific hardware configuration.

Connecting a Display (Monitor)

- 1 Plug the display's cable into the monitor port.
- 2 If necessary, plug the display's cable into the rear of the display.

To connect a display

To connect a DVI display

 Install your equipment so that you can easily reach the power outlet in the event of an emergency.

Connecting the Speakers and Sub-woofer Unit

- 1 Plug the cable attached to the back of the left speaker into the L Out jack on the back of the right speaker.
- 2 Insert the yellow plug of the speaker power cable into the DC In jack (yellow) on the back of the right speaker.
- 3 Insert the black plug of the speaker power cable into the DC Out jack located on the back panel of your computer.

To connect the computer, speakers, and sub-woofer unit

- 4 Insert the RCA plug of the cable that is attached to the right speaker into the speaker jack, located on the left side of the sub-woofer unit.

To connect the sub-woofer unit

- 5 Insert the RCA plug of the sub-woofer unit's cable into the Line Out jack, located on the back panel of your computer.

- 6 Plug the sub-woofer unit's power cord into a grounded AC wall outlet or power strip.

To connect the sub-woofer to the computer

Connecting the Keyboard and Mouse

- 1 Plug the keyboard cable into the keyboard port on the back of the computer.
- 2 Plug the mouse cable into the mouse port on the back of the computer.

To connect the keyboard and mouse

To use an optical mouse

An optical mouse requires an ideal surface texture in order to provide precision pointing and tracking.

- ☐ Use surfaces such as plain paper, card stock, or fabric that have minimal repetitive patterning.
- ☐ Avoid surfaces such as mirrors, smooth glass, or magazines that have halftone printing.

Connecting the Telephone and Modem cables

- 1 Unplug your telephone from the wall jack and plug it into the telephone jack, located on the back panel of your computer.
- 2 Plug the modem cable (supplied) into the Line jack, located on the back panel of your computer.
- 3 Plug the other end of the modem cable into the wall jack.

To connect the telephone and modem cables

Your computer has a protective sticker  covering the Ethernet port located on the rear panel. Connect 10BASE-T, 100BASE-TX or 1000BASE-TX cables to the Ethernet port. Using other cables or a telephone cable may result in an electric current overload that can cause a malfunction, excessive heat, or fire in the Ethernet port. For help on connecting to a network, see your network administrator.

Connecting the Power Cords

- 1 Plug the power cord into the back of the computer.
- 2 Plug both the display and computer power cords into a grounded AC wall outlet or a power strip.

To connect the power cords

Turning On Your Computer

When you start your computer for the first time, your computer may detect new equipment and display a dialog box that prompts you to restart your computer. Respond to this prompt immediately.

 If your computer has the Microsoft® Windows® XP Media Center Edition 2004 operating system preinstalled, set up your Media Center cables and connections, before you begin using your computer. For detailed instructions, see “Setting Up Microsoft Windows XP Media Center Edition 2004” on page 49.

- 1 Press the power switch on the computer to turn on the power.
- 2 Press the power switch on the display to turn on the power.
- 3 Press the power switch on the right speaker to turn on the power.

To turn on your computer

Registering Your Computer

Take advantage of Sony's commitment to quality customer support and receive these benefits by registering your computer:

- ❑ **Sony Customer Support** — Communicate with a Support Representative to troubleshoot problems you may be having with your computer.
- ❑ **Limited warranty** — Protect your investment. See the Limited Warranty Card for more details.

You are prompted to register your computer the first time you turn on the unit. Follow the on-screen instructions to complete the registration process. If you do not register your computer during the first session, you are provided with additional registration opportunities later.

Turning Off Your Computer

Follow these steps when you are ready to turn off your computer for an extended period of time. If you plan to stop using your computer for a short period of time, use Stand by mode.

To avoid loss of data, do not use the Power button to turn off the computer.

To turn off your computer

- 1 Click **Start** in the Windows taskbar, then select **Turn Off Computer**.

The Turn Off Computer dialog box appears.

- 2 Select the **Turn Off** option.

Respond to any prompts about saving your documents.

- 3 Wait for your computer to turn off automatically—the power indicator light turns off.
- 4 Turn off any peripheral devices connected to your computer.

About the power button

If your computer stops responding, press and hold the Power button for more than six seconds to force your computer to shut down. You may need to repeat this procedure if your computer does not shut down on the first attempt.

Setting Up Microsoft Windows XP Media Center Edition 2004

Welcome to a new and exciting experience in home entertainment, with your VAIO Digital Studio® computer and the Microsoft® Windows® XP Media Center Edition 2004 (Media Center). Your new computer and the Media Center integrates all of your entertainment sources — TV, VCR, music, pictures, and DVD player — into one location that is easily accessed with a Media Center remote control, a mouse, or a keyboard. This section provides information about setting up Media Center, your computer, TV, cable or satellite set-top box, and other peripheral equipment.*

* The Microsoft® Windows® XP Media Center Edition 2004 operating system is available on certain VAIO Digital Studio® computers. See your online specifications sheet for more information about your computer's configuration.

Microsoft Windows Media Center Edition 2004

The Microsoft® Windows® XP Media Center Edition 2004 operating system combines the multimedia features of a personal computer with the convenience of a home entertainment center. Media Center enables you to view, organize, store, and browse your photos, video/movie libraries, music playlists, and recorded TV programs, while running other software programs.

Media Center enables you to perform many functions, such as:

- ☐ Viewing and recording TV programs
- ☐ Playing CDs, DVDs, and digital videos
- ☐ Creating music playlists and listening to music files
- ☐ Viewing digital photos individually or as a slide show with background music
- ☐ Enjoying TV, DVDs, or your favorite music, while performing other tasks on your computer

Your VAIO Digital Studio computer and Media Center

Your VAIO Digital Studio® computer compliments this exceptional operating system with preinstalled multimedia software programs, superior graphics and audio capability, and a DVD±RW drive that burns and plays DVD and CD media.

Your computer comes equipped with features that enhance Media Center. You can:

- ☐ Set up a home network to share media content
- ☐ Edit and organize digital images
- ☐ Save your favorite recorded TV programs to DVD media
- ☐ Play and edit your home videos
- ☐ Create DVDs by capturing video content straight from a digital video device
- ☐ Burn music files to CD media

Before you begin using Media Center

There are several tasks to complete before you are ready to use Media Center features. Read this checklist before you begin using the Media Center software program, to enable full use of all the features.

- ☐ Set up your VAIO® computer, accessories, and peripheral equipment correctly, following the instructions in the section, “Setting Up Your Computer” on page 39.
- ☐ Evaluate your home environment to determine the best way to connect your TV, set-top box (cable or satellite), Internet, and computer.
- ☐ Establish an active Internet connection.
- ☐ Connect your computer to the TV signal source.
- ☐ Insert two AA batteries into the Media Center remote control.
- ☐ Plug the remote sensor unit into a USB port on your computer and place it in a location that enables direct communication with the remote control.
- ☐ Connect the remote sensor control between your cable or satellite set-top box, and the remote sensor unit.

Additional information about Media Center

For more information about setting up Media Center hardware or software, see the online VAIO Computer User Guide.

To access the online User Guide:

- 1** Click **Start** in the Windows taskbar, then click **Help and Support**.
- 2** From the **VAIO Help and Support Center** menu, click **VAIO User Guide**.

An Internet connection and TV signal source are not required to use some features, but Sony recommends using these options to fully experience Media Center.

Setting Up TV Connections

The best method of connecting your computer, TV monitor or display, and TV programming access, is determined by the type of cable service connection available in your home. Your computer's hardware configuration may vary from the illustrations shown in this section. See the online Specifications sheet for details about your computer's hardware configuration.

 Your VAIO Digital Studio ® computer is supplied with certain video cables. Depending on your in-home cable access, you may require extra cables, adapters or connection equipment not supplied with your computer.

Connecting to standard cable access (CATV)

Option 1

- 1 Connect one end of the TV coaxial cable (supplied) to your cable service access.
- 2 Connect the other end of the TV coaxial cable to the VHF/UHF port on the back panel of your computer.

To connect in CATV mode (Option 1)

Option 2

- 1 Connect one end of a TV coaxial cable (optional) to your cable service access. Connect the other end to the single-connection side of a splitter adapter.
- 2 Connect the TV coaxial cable (supplied) to the double-connection side of the splitter adapter. Connect the other end to the VHF/UHF port on the back panel of your computer.
- 3 Connect a third TV coaxial cable (optional) to the double-connection side of the splitter adapter. Connect the other end to the VHF/UHF port on the back of your TV monitor or display.

To connect in CATV mode (Option 2)

Connecting to a standard antenna (air) system

You can connect your computer to an indoor/outdoor antenna system, using Option 1 or 2 from the previous section, “Connecting to standard cable access (CATV)” on page 52. The antenna system in your home may require a VHF/UHF RF combiner/transformer (optional) to connect your computer and the indoor/outdoor antenna system.

 If you are connecting to an indoor/outdoor antenna system, you may need to reorient the antenna for better reception.

Option 1

- 1 Connect one end of a TV coaxial cable (optional) to your antenna outlet. Connect the other end to a VHF/UHF RF combiner/transformer (optional).
- 2 Connect the TV coaxial cable (supplied) from the combiner/transformer to the VHF/UHF port on the back panel of your computer.

Option 2

- 1 Connect both ends of the antenna's twin lead cable to the screw-type grips on the combiner/transformer.
- 2 Connect the TV coaxial cable (supplied) from the combiner/transformer to the VHF/UHF port on the back panel of your computer.

To connect in standard antenna mode (air)

 Your VAIO Digital Studio® computer is supplied with certain video cables. Depending on your in-home cable access, you may require extra cables, adapters or connection equipment not supplied with your computer.

Connecting a Cable or Satellite Set-top Box

You can connect your computer to cable or satellite service that requires a set-top box.

Option 1

- 1** Connect one end of a TV coaxial cable (optional) to your cable service access. Connect the other end to the In jack on the back panel of your set-top box.
- 2** Connect a second TV coaxial cable (optional) to the Out jack on your set-top box. Connect the other end to the single-connection end of a splitter adapter (optional).
- 3** Connect a third TV coaxial cable (supplied) to the double-connection end of the splitter adapter. Connect the other end to the VHF/UHF port on the back panel of your computer.
- 4** Connect a fourth TV coaxial cable (optional) to the double-connection end of the splitter adapter. Connect the other end to the VHF/UHF port on the rear of your TV monitor or display.

To connect in set-top box mode (Option 1)

Option 2

- 1 Connect one end of the TV coaxial cable (supplied) to your cable service access. Connect the other end to the In jack on the back panel of your set-top box.
- 2 Connect a second TV coaxial cable (optional) to the Out jack on your set-top box. Connect the other end to the VHF/UHF port on the rear of your TV monitor or display.
- 3 Connect one end of the stereo A/V dubbing cables with triple RCA jacks (optional) to the Video Out and Audio-OUT (L/R) jacks on the back panel of your set-top box, matching the plug and jack colors.
- 4 Connect the other RCA jacks of the stereo dubbing cable into the Audio-R (IN), Audio-L (IN), and Composite video (IN) jacks on the back panel of your computer, matching the plug and jack colors.

To connect in set-top box mode (Option 2)

 You can connect your computer to a set-top box using an S-video cable (optional) instead of a stereo A/V dubbing cable (optional). See “Setting Up Additional Equipment” on page 62.

Connecting the Remote Sensor

The remote sensor communicates with the Media Center remote control, enabling you to change channels and to perform other functions. If you are using a cable or satellite set-top box, you can connect the remote sensor control to the remote sensor, which enables you to control the set-top box with the remote control.

- 1 Connect the remote sensor unit to a USB port located on either the front or back panel of your computer. Place the remote sensor in a position that enables it to communicate with your remote control.

Connecting the remote sensor (back panel)

- 2 Plug the remote sensor control's cable into a jack (1 or 2) located on the back of the remote sensor.

 When you attach the remote control sensor to a cable or satellite set-top box, you can control the set-top box functions with your remote control.

Connecting the remote sensor and remote sensor control

- 3 Place the remote sensor control above the set-top box's infrared port:
 - 1 Attach the double-sided adhesive tape to the top of the set-top box.
 - 2 Press the remote sensor control onto the tape, ensuring that the front edge extends over the front of the box, as shown in the following illustration.

Connecting the remote sensor control cable to a cable or satellite set-top box

 The remote sensor unit must be visible in a line-of-sight with your remote control in order to function properly.

Setting Up Additional Equipment

This section illustrates how to set up additional equipment with your VAIO Digital Studio® computer.

Connecting a VCR or camcorder with an audio cable

Your computer has both audio and video connection capability. You can locate the appropriate connections behind the lower bottom panel on the front of the computer or on the back panel. You can connect a VCR or camcorder, using the composite audio In jacks and video ports.

- 1 Connect a dual audio cable (optional) to the composite audio L and R In jacks, located on the either the front or rear panels of your computer.
- 2 Connect the other ends of the dual audio cable to your VCR or camcorder.

Connecting devices with an S-video or video cable

Your VCR or camcorder may have either standard video or S-video connection capability.

Option 1

- 1 Connect an S-video cable (optional) directly into the S-video jack on either the front or back panel of your computer.
- 2 Connect the other end of the S-video cable into the appropriate port on your compatible VCR or camcorder.
- 3 Connect an audio cable with dual RCA plugs at each end (optional) into the composite audio L and R jacks.

To connect a VCR or camcorder (Option 1)

Option 2

- 1 Connect a stereo A/V dubbing cable with triple RCA plugs at each end (optional) directly into the composite video port, composite audio L and R jacks, located on either the front or back panel of your computer.
- 2 Connect the other ends of the stereo A/V dubbing cable into the appropriate jacks on your compatible VCR or camcorder.

Connecting a TV monitor (display)

- 1 Connect the video connector end of the video cable adapter (supplied) to the TV Out (S-video/video) jack on the back panel of your computer.
- 2 Connect the jack end of the video cable adapter to either end of a video cable (optional). Connect the other end of the video cable to the Video-In jack on your TV monitor or display, located on either the side or back of your TV monitor/display.
- 3 Connect the single-jack end of an audio cable (optional) to the Line In jack on the back panel of your computer. Connect the double-jack end of the audio cable to the Audio-In (L/R) on your TV monitor or display. (The Audio-In jacks may be located on the side or rear of your TV monitor/display.)

Connecting a TV monitor or display

The video adapter is not needed, if you use an S-video cable to connect your TV to the computer's TV out (S-video/video) jack.

Using Media Center

You can start Media Center and switch between the different functions by pressing a button on the remote control*, using your computer's keyboard, or clicking the mouse. You can also record TV, watch videos, play music, and use other software programs.

Starting Media Center using the remote control

- 1 Point the remote control at the remote sensor and press .

 The remote control must be used within 26 feet (8 meters) of the front of remote sensor unit.

- 2 Use the arrow buttons on the remote control to navigate and select menu items. Press the **OK** button to activate your selection.

Starting the Media Center Setup Wizard

The setup wizard requires you to provide certain information about your equipment and home environment. To make the setup process easier, be prepared to:

- ☐ Log on to Windows® operating system as the administrator. For more information, go to the VAIO Help and Support Center.
- ☐ Establish a working Internet connection to enable the download of your local television program guide.
- ☐ Provide your Zip code or Postal Code.
- ☐ Provide the name of your TV programming provider or the name of your subscription package, if using cable or satellite service.
- ☐ Identify the brand name for your set-top box, if your TV service requires one.

To get assistance with the **Media Center** setup wizard at any time during the setup process, click **Help** button.

Using the setup wizard

The first time you start the Media Center, a setup wizard appears. Follow the steps in Media Center setup wizard to properly activate and configure Media Center. The setup wizard tests your remote control, configures your Internet connection and TV broadcast signal, and sets up the Television Program Guide for your local area.

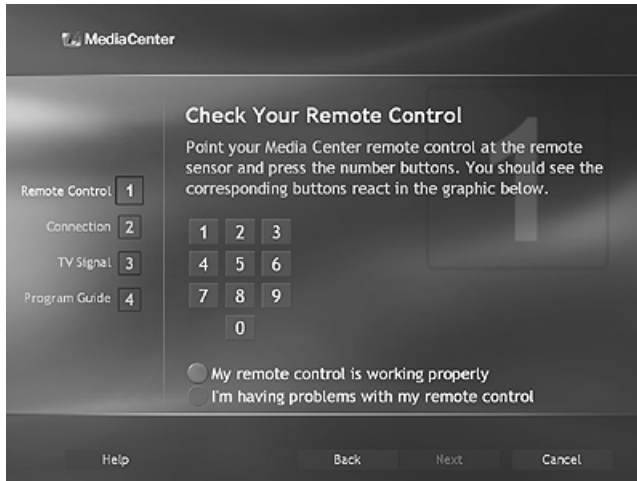

Media Center - Getting Started

 If you decide to skip any of the setup wizard steps, you can complete them later in the Settings window in Media Center.

- ❑ **Check Remote Control** — The Media Center uses this interactive step to verify that the remote control is communicating with the remote sensor. The LED on the remote control blinks when a button is pressed.

Media Center - Check Your Remote Control

 Verify that your remote control has two AA batteries installed.

- ❑ **Set up Internet Connection** — The Media Center setup wizard uses an active Internet connection to set up and update your local Television Program Guide. If you have already established an Internet connection, you are asked to choose a download method. Select the appropriate download option, and follow the on-screen instructions.

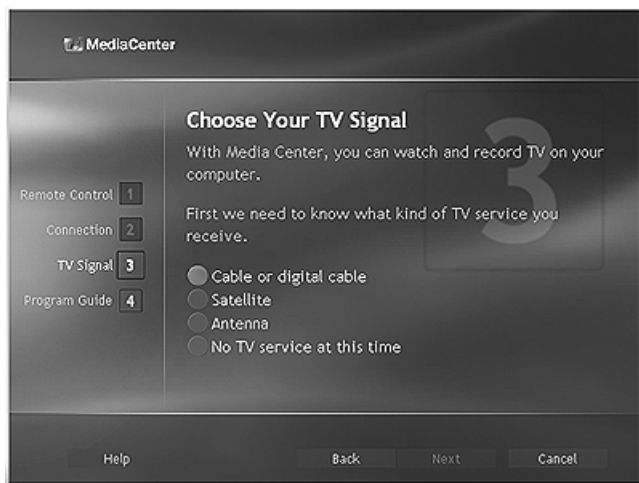

Media Center - Download Method

-  The Internet connection provides information about your music CDs and other media. If you skip this step, you can complete them later in the Settings window in Media Center.

- ❑ **Set up Television Signal** — The Media Center setup wizard verifies that your computer is receiving the correct TV signal and local TV Program Guide. If you are using a cable or satellite set-top box, this step programs your remote to the box, enabling you to view premium channels.

Media Center - Choose Your TV Signal

 Verify that your TV signal source is connected to the computer.

- ❑ **Set up Television Program Guide** — The Media Center setup wizard enables your computer to automatically connect to the Internet to update your Television Program Guide. The Guide displays available channels, network, and program information.

Media Center - Program Guide

The message, **No data available** is displayed in the Television Program Guide when:

- ❑ The Guide has not been set up.
- ❑ You have not agreed to the Television Program Guide's *Terms of Service*.
- ❑ The Media Center cannot connect to the Internet and download new Guide information.
- ❑ Guide information is not available for your location, from the Microsoft TV listings service provider.
- ❑ Media Center has determined that the existing Guide information on your computer is expired or corrupted.

 For more information on using Microsoft® Windows® XP Media Center Edition 2004, see the online VAIO Computer User Guide.

Using Media Card Slots

This section has information about the CompactFlash®/MicroDrive and SmartMedia slots. Your computer may not be equipped with all of the hardware features described in this section, depending on the computer model purchased. To view the specific hardware configuration for your computer, see the online Specifications sheet.

Using the CompactFlash/MicroDrive Slot

Your VAIO® computer is equipped with a CompactFlash®/MicroDrive media slot that supports both CompactFlash® and MicroDrive media cards*. This media slot also supports Secure Digital (SD) or MultiMedia (MMC) cards*, using the supplied SD/MMC adapter†. The SD/MMC adapter only supports standard-size SD or MMC media.

Inserting a CompactFlash or MicroDrive media card

Insert CompactFlash or MicroDrive media card into the card slot. If the card does not insert easily, remove it from the slot and verify that it is not upside-down or backwards. Carefully reinsert the media card, but do not force it into the slot.

Always insert an appropriate media card into the CompactFlash/MicroDrive media card slot for proper operation. Do not insert any other type of media card into the CompactFlash/MicroDrive media slot.

To insert a CompactFlash or MicroDrive media card

* Secure Digital (SD) and MultiMedia cards are small, high-capacity data storage media.

† The SD/MMC adapter is not available with all VAIO Digital Studio® computer models. For details about your computer's supplied accessories, go to the Sony Online Computing Web site and view your computer's specifications sheet.

Using the SD/MMC adapter

- 1 Insert an SD or MMC media into the supplied SD/MMC adapter.
- 2 Press until the card locks into place.
- 3 Insert the SD/MMC adapter into the CompactFlash/MicroDrive media slot, as shown.

If the SD/MMC adapter does not insert easily, remove it from the media slot and verify that it is not upside-down or backwards. Carefully reinsert the SD/MMC adapter, but do not force it into the slot.

Always insert the appropriate SD or MMC media into the SD/MMC adapter for proper operation. Do not attempt to insert any other type of media card or media adapter into the supplied SD/MMC adapter.

To use the SD/MMC adapter with an SD or MMC media

Removing a media card or the SD/MMC adapter

- 1 Press the media card eject button to release the media card or SD/MMC adapter from the media card slot. The card or adapter extends further, enabling you to grasp it.

To remove a media card or SD/MMC adapter

- 2 Carefully remove the media card or SD/MMC adapter from the slot.

Do not remove the media card or SD/MMC adapter while the media access indicator light is on. The media or data may become damaged.

Removing an SD or MMC media card from the SD/MMC adapter

- 1 Press the extended portion of the SD/MMC media card in until it stops, and then release. The media extends farther, enabling you to grasp it.
- 2 Gently remove the SD/MMC media card from the SD/MMC adapter.

To remove an SD or MMC media from the SD/MMC adapter

Using the SmartMedia Card Slot

Your VAIO® computer is equipped with a SmartMedia™ card slot that supports SmartMedia cards*.

Always insert a SmartMedia card into the SmartMedia card slot for proper operation. Do not insert any other type of card into the SmartMedia card slot.

Inserting a SmartMedia card

- 1 Insert the SmartMedia card into the SmartMedia card slot.

To insert a SmartMedia card

- 2 If the media does not insert easily, remove it from the slot and verify that it is not upside-down or backwards. Carefully reinsert the SmartMedia card, but do not force it into the slot.

* SmartMedia cards are small, thin, high-capacity data storage media.

Removing a SmartMedia card

Carefully pull the extended portion of the SmartMedia card to remove it from the SmartMedia card slot.

Removing a SmartMedia card

Do not remove the SmartMedia card while the media access indicator light is on. The media or its data may become damaged.

Additional Information About Media Cards

If you plan to share a CompactFlash, MicroDrive, Secure Digital (SD), MultiMedia (MMC), or SmartMedia card between your VAIO® computer and other devices, such as a digital camera or music player, the media card must be formatted properly.

- ❑ Format the media card by using it in the device first. See the information supplied with the device for details on formatting media.
- ❑ If your device does not recognize a media card that has been formatted by your computer:
 - 1 Save the media's contents to your hard disk drive.
 - 2 Reformat the media with the device.

When using a SD or MMC media, always insert it into the supplied SD/MMC adapter to ensure proper operation.

- ❑ Do not attempt to insert any other type of media card into the supplied SD/MMC adapter. An incompatible media card may be difficult to remove from the SD/MMC adapter, and cause harm to your computer if you attempt to use it in the CompactFlash/MicroDrive media slot.
- ❑ Do not attempt to insert any other type of media card adapter into the supplied SD/MMC adapter, such as a Mini SD or MMC adapter. A media card adapter may be difficult to remove from the SD/MMC adapter, and can cause harm to your computer if you attempt to use it in the CompactFlash/MicroDrive media slot.

Troubleshooting

This section describes how to troubleshoot common problems. For information on other troubleshooting topics, see the online VAIO® Computer User Guide.

My computer does not start.

- ☐ Verify that the computer is plugged into a power source and that it is turned on. Check that the power indicator is lit on the front panel of the computer.
- ☐ Confirm that a disk is not in the floppy disk drive* (unless you are using a bootable floppy disk).
- ☐ Confirm that a CD is not in an optical drive (unless you are using a bootable CD).
- ☐ Confirm that the power cord and all cables are connected firmly.
- ☐ If you plugged the computer into a power strip or Uninterruptible Power Supply (UPS), make sure the power strip or UPS is turned on and working.
- ☐ Verify that the monitor is plugged into a power source and turned on.
If your computer has a built-in monitor, confirm that it is plugged into an appropriate power source and that the computer is turned on.
- ☐ Verify that the brightness or contrast control dials are adjusted correctly. (See the manual supplied with your display for details.)
- ☐ Confirm that the computer is not in Stand by mode by pressing any key on the keyboard.

* Certain VAIO computers are not equipped with a floppy disk drive. You can purchase this equipment separately.

What can I do if my computer or software stop responding?

You can try to locate and close the software program that has stopped responding.

- 1 Press the **Ctrl+Alt+Delete** keys. The **Windows Task Manager** window appears.
- 2 From the Applications tab, locate the software program that has the status message, “**Not responding.**”
- 3 Select the software program that has a **Not Responding** status and click **End Task**. Windows attempts to close the program.

If your computer does not respond or the software program does not close:

- 1 Save and close any open files, if possible.
- 2 Press the **Alt+F4** keys. The **Shut Down Windows** window appears.
- 3 Click the drop-down list box and select **Restart**.
- 4 Click **OK**. The computer turns off and restarts.

If the **Shut Down Windows** window does not appear:

- 1 Press **Ctrl+Alt+Delete**. The **Windows Security** window appears.
- 2 Click **Shut Down**.
- 3 Restart your computer.

If your computer still does not respond and you cannot restart, shut down your computer by pressing and holding the power button for more than six seconds.

If the software program continues to stop responding or causes your computer to stop responding, contact the software publisher or designated technical support provider.

Pressing and holding the power button for more than six seconds may result in the loss of data from files that are currently open.

Support Options

Sony provides several options to help solve common problems or to locate technical support for your VAIO® computer. This section describes all available resources and offers suggestions on how to access this information for maximum results.

Immediate Help and Support

You can locate helpful information immediately by consulting your hard copy guides and supplements, or by accessing the online Computer User Guide and the individual software Help files.

Your computer is supplied with these support options:
